

ADMINISTRATIVE - INTERNAL USE ONLY

5 NOV 1979

MEMORANDUM FOR: Chief, Plans and Program Staff, OL
FROM: [REDACTED]
Chief, Supply Division, OL
SUBJECT: New Communications Support Requirements
for FY 1982-1986
REFERENCE: Verbal Request from P&PS

1. The Supply Division communications requirements, including [REDACTED] for the fiscal years 1982-1986 have been examined. As a result of this review the following is a summary of our requirements:

a. Requirements for FY 1980 through 1984

During fiscal year 1980 the development process will begin for the design of a new automated supply system. The early plans for this system include concepts which would have an enormous effect on this Division's communications needs. Some of the features include input and access to the system by Logistics Officers in the Headquarters area, and linkup to the Agency worldwide communications system to allow Agency personnel identification and budgetary data access.

The system's internal operations will require communications established to service dispersed modules of the network. These modules will be located in [REDACTED] Headquarters, [REDACTED] and [REDACTED] Procurement Office.

b. Requirements for FY 1985 and 1986

There are no known requirements identified for these fiscal years.
